

Preparing for Your Hearing Assessment

A little preparation helps us get accurate results and keeps your visit short.

Before you arrive

- Arrive 10 minutes early to complete a short health history form.
- Bring your Medicare card, concession card (if you have one) and any previous audiograms.
- Bring your current hearing aids and chargers if you wear them.
- Avoid loud noise for 16 hours before your test, as it can temporarily affect results.
- If you have a cold or blocked ears, call us. We may recommend rescheduling.
- You are welcome to bring a family member or friend to the appointment.

What to expect

The assessment is painless and does not involve any needles or medication. Your audiologist will check your ears, play a series of tones and words through headphones, and explain your results straight away.
